Experience

Software Engineering Fellow February 2023 - Present
General Assembly | Remote

- Currently enrolled in a 12-week, full-time (60+ hrs/week) immersive software engineering program covering current front-end and back-end web technologies and frameworks
- Coursework includes lessons, lectures, and both solo/group week-long sprints building full-stack applications with a variety of different functionalities

Data & Operations Analyst August 2020 - November 2022
First Tube | Remote

- I developed robust cross-departmental internal tools, systems, and processes that allowed us scale and improve efficiency
- Built multi-faceted pricing models/databases and program budgeting/forecasting tools for campaigns ranging from $6k-$5MM+
- Helped develop proof of concept, refine and prototype a complex media analytics tool to make automated API calls to dozens of different platforms and data sources
